Creepage/Clearance Gauge Set -- Model CSG31

The Gauge Set measures creepage and clearance distances of insulation and spacings of electronic equipment and other products as required by all international standards. There are 31 gauges: 0.6 to 2.0 mm in steps of .1m; and 2.5 to 10.0 mm in steps of .5 mm. Tolerance +0 / -0.02 mm. Extra small gauges have been added to measure modern printed wiring distances. Made of stainless steel.
